

Elizabeth Arden

NEW YORK

Elizabeth Arden established the American Beauty industry over a century ago. Elizabeth Arden's fundamental belief was that beauty should not be a veneer of makeup but intelligent cooperation between science and nature in order to develop a woman's finest natural assets. The Elizabeth Arden Eyewear Collection is a diverse eyewear collection offering a modern yet classic design aesthetic featuring rich colors, sophisticated details and timeless profiles.

Classics – Stylish frames that are progressive friendly, that reflect a modern point of view.

Petites – Designed to complement women who have smaller, delicate and narrow facial features but who still desire vibrant colors, style and contemporary styles.
