## Bio-actete 2023

Eco-Biodegradable Material  
Sustainable materials is so important to us and our commitment towards a sustainable future.

Do you know

- Plastic bags last for 10 to 100 years
- Plastic Bottles 450 to 1000 years
- Fishing Line over 600 years

Everyone has the responsibility to do something

We are so proud to introduce POP Material in our new

Big & Tall frames.

Our bio-acetate material is based on substances which occur in nature like wood and cotton. With organic mix of material that degrades back to nature.

Born out of nature and goes back to nature

Thank you for your concern  
each of us can contribute to the future of  
the world

**BT 127**
